

ABHAY YADAV

Aspiring AI Engineer specializing in Agentic AI, LLM application development, and full stack engineering
☎ +918471090729 ✉ abhayadav1807@gmail.com 📍 AbhayYadav 📍 Abhay-Yadav1 📍 Lucknow, India

PROFESSIONAL SUMMARY

Experienced building production-grade RAG systems, multi-agent pipelines, and REST API backends. Oracle Cloud GenAI certified with hands-on deployment experience using Docker and FastAPI.

WORK EXPERIENCES

Python Full Stack Developer Trainee | Internship Sep 2025 - Oct 2025
SRDT Pvt. Ltd. *On-site • On-Site*
• **Independently built and deployed** 2 full stack web applications using **Flask and React**, handling end-to-end development from coding to production.
• **Designed MySQL schemas** for 3+ modules, **reducing redundant queries** by structuring normalized relational tables for efficient data retrieval.
Technologies / Skills Used : Flask, React, MySQL

AI/ML Intern | Internship Sep 2024 - Nov 2024
Corizo Ed. Tech. *Remote • Remote*
• **Built a content-based movie recommendation system** using **TF-IDF** and cosine similarity, achieving **85% relevance accuracy** across 1,000+ titles.
• **Developed a custom CNN** for object detection with convolutional layers; trained model reached **90%+ classification accuracy** on test data.
Technologies / Skills Used : TF-IDF, CNN

PROJECTS

Intelligent Database Query Agent | 📍 Abhay-Yadav1 Mar 2026 - Apr 2026
Developer
• **Engineered a 5-agent Text-to-SQL pipeline** using **LangGraph** translating natural language to SQL via few-shot learning, supporting 10+ query types.
• **Implemented risk-scoring HITL validator** intercepting 100% of destructive commands (DELETE, DROP) before execution, preventing accidental data loss.
• **Containerized full-stack app** (FastAPI backend + React frontend) with **Docker**; reduced local setup time to under 2 minutes.
Technologies / Tools Used : Python, LangGraph, LangChain, FastAPI, Docker, SQLite

YouTube Video Summarizer – RAG System | 📍 Abhay-Yadav1 Dec 2025
Developer
• **Developed a RAG pipeline** using **vector embeddings** (Hugging Face) and Groq LLM to summarize YouTube transcripts in under 10 seconds, achieving high factual accuracy.
• **Integrated** a LangChain-based retrieval pipeline with chunked transcript indexing, enabling context-aware summarization for long-form videos exceeding 1 hour.
Technologies / Tools Used : LangChain, Groq LLM, Hugging Face, Python

SKILLS

Databases :	PostgreSQL, MySQL, SQLite
Frameworks Libraries :	Flask, React.js, FastAPI, LangChain, LangGraph, TensorFlow, Keras, Scikit-learn, Hugging Face, NLTK, OpenCV
Programming Languages :	Python, Java, JavaScript, SQL, HTML, CSS
Soft Skills :	Leadership, Problem Solving, Teamwork
Tools Platforms :	Docker, Git, REST APIs

CERTIFICATIONS

Oracle Cloud Infrastructure 2025 Certified Generative AI Professional – Prompt engineering, RAG, LLM deployment on OCI.

EDUCATIONS

SRMCEM | Lucknow, Uttar Pradesh, India 2023 - Present
B.Tech - Information Technology
• **B.Tech - Information Technology**, SRMCEM, **GPA: 7.67**
Bal Vidya Mandir School | Lucknow, Uttar Pradesh, India Apr 2022 - Mar 2023
Class XII
• **Class XII**, Bal Vidya Mandir School, **Percentage: 93.2%**

AWARDS & ACHIEVEMENTS

- **Solved over 100** Data Structures and Algorithms (DSA) problems on LeetCode, showcasing **strong problem-solving, algorithmic thinking**, and coding proficiency.
- **4th Place** – HackwithUP 2025 Hackathon, Chandigarh University
- **1st Runner-Up** – UI/UX, Gantavya Techfest SRMCEM, Apr 2024
